

## VICMARC SHG001 SWIVEL HEAD GRINDER

The SHG001 is designed for single handed operation with the option of using a domestic or industrial vacuum cleaner for dust extraction. Head angle adjustment is a simple twist, rotate and twist operation.

### Operating Instructions

#### Head Angle Adjustment

Twist the handle (item 1) counter clockwise a half turn to release the head (item 3).

Rotate head to desired angle

Twist handle clockwise to tighten and lock head in place. Do not overtighten!

#### Vacuum Facility

The SHG001 is design to accept a standard 32mm (1 ¼") domestic vacuum hose nozzle.

Insert the vacuum hose nozzle into the open end of the handle (item 1) and twist. The nozzle should lock into place.

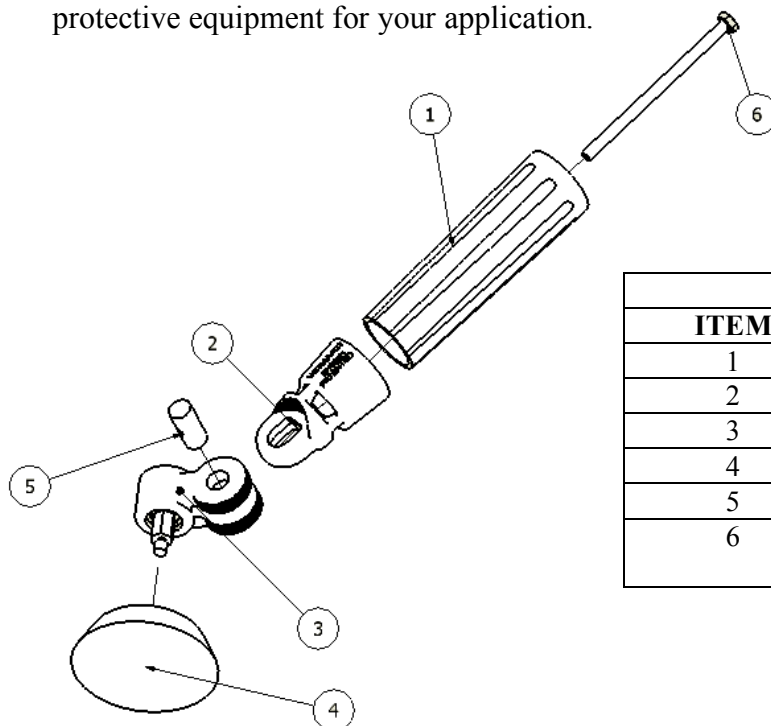

To remove the hose twist the nozzle while pulling outwards.

#### Sanding Pad

The sanding pad has a Velcro facing. Only sanding discs designed for attachment to Velcro pads should be used.

#### Safety

Always follow woodturning safety procedures, and use appropriate personal protective equipment for your application.
